## **DETAILED ACTION**

### ***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1 and 12 are rejected under 35 U.S.C. 103(a) as being unpatentable over what is known in the art.

Applicants admits that multilayered bender structures are known in the art. Also, the prior art teaches that one of the layers may be none piezoelectric layer. In addition, it is known that piezoresistive materials are used as layers next to or in the same device to obtain proper response. It would have been obvious to one having ordinary skill in the art to add layer of piezoresistive material to piezoelectric multilayered device since such would improve electric and mechanical properties of the bender.

Claims 2-5,7-11,13-14 are rejected as dependent on the rejected base claim.
